DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to a method for isolating amplifiable nucleic acids from a solid stool sample.

Group II, claim(s) 8-13, drawn to a method for screening for an H. pylori infection in a patient.

Group III, claim(s) 14-17, drawn to a method for isolating amplifiable bacterial DNA from a solid stool sample.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each group represents a unique method, comprising method steps that differ from one another. Groups I and III also differ from Group II in that they do not share a common goal, as evidenced by the preamble. Group I and III differ because they require different processes to be carried out to achieve the goal, and therefore lack the same special technical features.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1634

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
